

## 4-IN-1 BUCKET

The ultimate bucket for versatility, our 4-in-1 Bucket delivers maximum fill with minimal effort for super efficient cycles.

The ultimate bucket for versatility, our Multi-Purpose 4-in-1 Bucket gives you a bucket, a dozer, a grapple as well as a scraper.

With a robust designed main pivot section, along with 30mm hardened pins, one-piece back plate design, curved side plates for easy carrying and other elements to add strength and durability that is second to none. The extra heavy duty flat floor is not only stronger, but allows easy filling and emptying of the bucket.

Our 4-in-1 buckets are manufactured from eie80 grade\* high strength steel and designed with large, heavy-duty double-acting hydraulic cylinders. The high rated Hallite seals ensure our hydraulic cylinders are capable of operating at pressures in excess of 350 Bar (5,000 psi). All pins are hardened and greaseable and have hardened bushes for easy replacement when wear occurs.

'eie80 grade high strength steel has a material hardness of 250 - 280 Brinell. It's  $3\times$  stronger and  $3\times$  more abrasion resistant than mild steel 250 grade.

## **SPECS:**

Included: Hoses, Bolt-on Dozer Edge

Optional: Teeth and Adaptors, Bolt-on Edge

Machine: Universal

Widths: 1250mm - 2100mm

19 Commercial Drive, Dandenong South, Melbourne Victoria Australia 3175 Phone: 1300 852 820

Email: sales@eiengineering.com.au

## 4-IN-1 BUCKET

"

All the radius' are spot on for trimming & picking things up. I love the strength of it and the bolt-on rear cutting edge.

One tough bucket.

CHRIS WOODS
EARTH TRIM EXCAVATIONS

"

| FEATURE   | ADVANTAGE  | BENEFIT   |
|---|--|---|
| Heavy duty Cast Bell Cranks   | Offer a lot of strength in the hinge areas, particularly when picking up uneven shaped objects | Increased efficiency saves time and money   |
| Large 30mm hardened hinge pins  | Less breakage when picking up uneven objects   | Greater reliability,<br>Less maintenance  |
| Large bucket opening  | Pick-up large materials easily   | Increases efficiency<br>Saves time and reduces costs  |
| Replaceable teeth<br>and weld-on adaptors and<br>Bolt-on Edges available  | Easy to change<br>Great Penetration<br>Greater wear resistance                                 | Less wasted time<br>on tooth changes<br>Less bucket wear  |
| Large 20mm Bisalloy<br>flat bottom plate  | Resists bowing and bending<br>Resists premature wear   | Increased versatility,<br>easier to pick material up  |
| Large Double-acting Cylinders   | Large hydraulic cylinders<br>create more power   | Greater reliability,<br>less maintenance, more power  |
| Hallite Hydraulic seals rated to<br>350 Bar, 5,000psi.<br>(Other skid steer hydraulic pumps can<br>only generate 3500 psi working pressure) | Guarantees the bucket can be used<br>under harsh working<br>conditions and heavy loads         | Greater pressure can compact<br>larger loads, meaning jobs can<br>be done quicker at less costs |
| One-piece Back Plate  | Spreads strength consistently over the width of the bucket                                     | More reliability,<br>gets work done faster  |
| eie80 grade* high strength steel  | 3 times stronger than mild steel<br>3 times more abrasion resistant                            | Less maintenance and replacement costs  |
| Larger welds  | More robust - longer bucket life   | Less maintenance and replacement costs  |

'eie80 grade high strength steel has a material hardness of 250 – 280 Brinell. It's  $3\times$  stronger and  $3\times$  more abrasion resistant than mild steel 250 grade.
